

(Continued from First Page.)

women are to, for want of a kind word or a sympathizing look, and she urged the formation of a ladies' committee of comfort and counsel for the failed and disconsolate women who have had a comrade in Boston with very favorable results.

VITAL STATISTICS.

Letter of Dr. Harris.

The following is Dr. Harris's regular letter to the Board of Health:

November 19, 1867.

In the week that ended yesterday, there was no death in New York, including 76 in the police institutions; 49 of the latter occurred in the State and County establishments on the East River. Below, there were 11 deaths in the County institutions and streets, and the rate of mortality is in New York, less than one-half that of the city.

James C. Smith for the plaintiff, B. D. Eaton and George Rice for defendants.

This Board met at noon yesterday, Mr. DeGraff in the chair.

Mr. Glavin received a claim for \$125.25 for work and materials furnished for repairing and altering Beer Shores during the year 1866.

Mr. Hayes presented a claim for \$2,000 for services in suspends in the Corporation Attorney's office from the year 1861 to 1865. Mr. George Shee testified that the claim dated prior to his admission to the bar. He had understood that Mr. Hayes came to receive for serving summonses and subpoenas \$13 per week, and he had complained that the sum of later years was not so much. James Croswell presented a claim for \$300 predicated upon damages sustained by an action against him.

The claims on the above cases were received and the Board adjourned.

TESTIMONY.

The Association met in the evening to the Music Hall, on the fourth floor of the Cooper Union. The exercises opened by Mr. George A. Foster, of Brooklyn, resolved in favor of:

CREDIT.

which is treated in a general way, showing especially that deposits are part of the currency, and that currency has a real value as compared with gold, but not so compared with labor or any other article. And the next day, in a speech in Congress, he said:

"The relative value of a dollar, or any metallic currency, depends upon its intrinsic value and gold must always command a price greater than itself, in its natural state."

He then gave his views in detail, to the law of supply and demand, and the principles of money, and the effect of the currency, and would remain free from the epidemic.

Mr. Hayes, in his speech, said that the Association had done well, and that the best thing to do was to wait and see what would come of it.

Mr. Hayes, in his speech, said that the currency was better than the gold, and that the gold was better than the silver.

Mr. Hayes, in his speech, said that the gold was better than the silver.

Mr. Hayes, in his speech, said that the gold was better than the silver.

Mr. Hayes, in his speech, said that the gold was better than the silver.
